

NASA Aeronautics Resources for Teachers

In this session, you will learn what the Aeronautics Research Mission Directorate at NASA is currently working on. You will also be introduced to the resources they have available for teachers to use.

Biography

Steve Kirsche has been a middle school science teacher in St. Johns, FL for the last 10 years. Last year, however, he took a sabbatical from teaching to work at NASA Headquarters in Washington, DC as part of the Einstein Fellowship. There, he worked in the Aeronautics Research Mission Directorate developing STEM related content around NASA's current aeronautics projects. Upon returning to his school district this year, he took a position as a secondary science coach where he works with middle and high school teachers throughout the school district. He also accepted a position working for NASA in the same role he fulfilled while in Washington, DC.
