

Flying Drones in the Classroom

Presenter: Joel Bresler

Joel is a teacher at the Central FL Aerospace Academy.

We will discuss how drones were introduced primarily as a recreational "toy" but has evolved into a tool for numerous commercial activities. All drone pilots should complete the TRUST course offered by the FAA. I will talk about how the TRUST can be used by teachers to introduce federal regulations of drone use in the national airspace system and then I can outline the requirements (Five major topics) for the FAA Remote Pilot Examination. Followed by an indoor flight activity using the tello drones. Teachers will have an opportunity to fly drones during this session.
